

# Interactive 8ft Mako Shark

## Lateral Line Motion Sensor

This complete unit includes 8ft anatomically - correct short fin mako shark with motion detector, which initiates a pulsating lateral line. The line will react to the distance of the viewer by speeding up the nearer the viewer gets, and decrease speed as you move away.

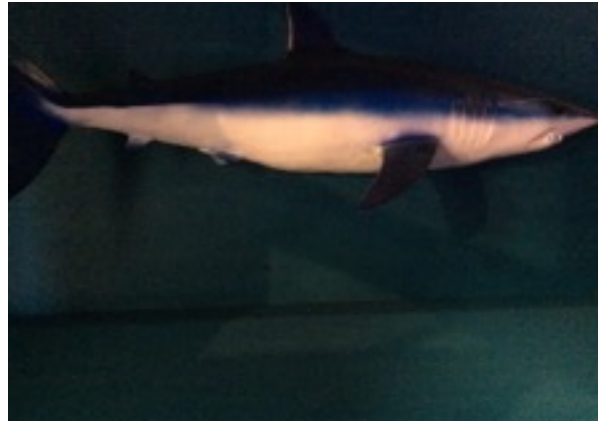

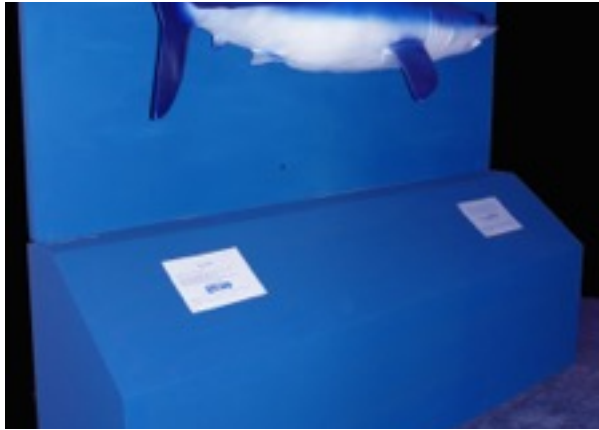

This is both an interactive and science unit. The base area has ample room for back lite or printed interpretation. This is a stand alone unit designed to fill dead areas within a visitor centre, best used at the end of an approach to benefit from the motion sensor element.

Exhibition artwork price. Oceanic exhibition by Scott Gleed Feb - Mar 2018

**£ 3,980.00** (delivery not included) No VAT

One off Ex Oceanic Exhibition Price.
